Family status: single, no kids

EDUCATION

M.Sc. Information Technology — University of Stuttgart, Germany

Oct 2022 – Feb 2026

- Focus Areas: Software/hardware, deep learning, distributed systems, data pipelines, mobile app development
- Master Thesis: Self-improving AI chatbot for domain-specific knowledge sharing in e-drive software development
- Master Thesis Grade 1.7

B.Eng. Mechatronic Engineering — UCSI University, Malaysia

Jan 2018 – Jan 2022

- Grade 1.7 (3.53/4.00 GPA) | 4× Dean's List Awards
- Bachelor Thesis: [Machine Learning for Tire Compound Quality Modeling, Elsevier \(2022\)](#) [Published]

WORK EXPERIENCE

Mercedes-Benz AG — Sindelfingen

AI RAG system – Electric Drive Systems (R&D) | Internship

Feb 2026 – Current

- Implemented and maintained CI/CD pipelines using GitHub Actions, enabling automated testing, streamlined deployments, and faster feature delivery.
- Conducted alpha and beta user testing, developed automated agentic test frameworks.
- Designed and optimized Azure-based cloud architecture, integrating Mercedes authentication and access management services while improving database performance, scalability, and system reliability.

AI RAG system – Electric Drive Systems (R&D) | Master Thesis

Aug 2025 – Feb 2026

- Built a full-stack AI knowledge management platform using FastAPI, React, Azure OpenAI, FAISS, BM25, and Azure SQL for domain-specific engineering knowledge retrieval.
- Implemented advanced RAG techniques including hybrid search, query expansion, HyDE, cross-encoder reranking, and adaptive chunking.
- Evaluated 9 RAG configurations and fine-tuned GPT-4.1 models using SFT and DPO, demonstrating performance improvements over baseline frontier models in domain-specific tasks.
- Group leader for the Mercedes AI Hackathon on hybrid RAG systems.

Software Engineering PMO (R&D Electric Drive Transmission) | Working Student

Jul 2024 – Aug 2025

- Automated Jira/Confluence workflows with REST APIs and custom scripts for release teams.
- Built interactive dashboards (HTML/JS) in Confluence integrating real-time Jira data.

Daimler Truck AG — Stuttgart

IT for Treasury & Procurement (IT Product Owner) | Working Student

Oct 2022 – Jun 2023

- Migrated Python 2 scripts to Python 3 and refactored legacy treasury automation codebase.

Continental / PETRONAS Sdn Bhd — Malaysia

Engineering & Automation | 2 Separate Internships

2020 – 2022 (6 months)

- Developed automation scripts, dashboards, and reporting tools to support engineering functions.

CORE SKILLS

AI & Machine Learning	RAG, LLM Fine-Tuning (SFT/DPO), AI Evaluation, FAISS, BM25
Software dev.	Python, FastAPI, React, TypeScript, REST APIs
Cloud & DevOps	Microsoft Azure, Cloud Architecture, GitHub Actions (CI/CD)
Data & Databases	Azure SQL, Redis, Blob Storage, PostgreSQL, Database Optimization

PERSONAL PROJECTS

Philosoph AI / <https://philosoph.onrender.com/>

- Built a multi-agent LLM simulation platform (prompt-chaining + frontend deployment).

CarPool App / <https://carpoolapp-q00v.onrender.com/>

- Full-stack web application (Go + React + PostgreSQL) for ride-sharing with JWT authentication.

LANGUAGES

- English (C1 IELTS)
- German (Goethe Zertifikat B1)

HOBBIES

- Tennis, volleyball, painting
